Válasz a kérdésre, hogy az előbb szereplő esetben, a kisebb számú karakterben, az előbbi végső haszon. . The problem is with the 2nd commit. If you add the version "0.0.1" of the composer in the composer.json file the version of the minify is displayed correctly. Is it possible to replace the version of the minify script in composer.json? Thanks. A: The OP answered his own question - you're right, it's actually the version of the minify.js script that's triggering the error. What he did was add the minify script in the composer.json file as a dependency with a specific version (0.0.1) - as a result, when they change the minify script version on their site, you see this error. You'll want to change the version of the minify script to 1.0.0 instead (and remove the version attribute on the minify.js script in the composer.json file). Q: Converting python modules to Cython I'm trying to convert some Python modules to Cython. I'm running Cygwin on Windows 7 64bit and in Cython I have the following error:

```
===== >>>> Welcome to ipykernel >>>> To start the IPython kernel run 'ipython
kernel' >>>> To drop to the ipython shell type 'ipython' >>>> To exit the ipython shell type 'exit' ----> 1 import numpy
/home/ynd/cygwin64/python/lib/python3.6/site-packages/numpy/__init__.py in () 52 53 from. import add_newdocs ---> 54
from.core import * 55 56 /home/ynd/cygwin64/python/lib/python3.6/site-packages/numpy/core/__init__.py in () 9 raise
ImportError("numpy.core is missing", name) 82157476af
```
